### Thai FDA's Revised Standard for Fluoride in Drinking Water (2)

**Report Categories:**

Sanitary/Phytosanitary/Food Safety

**Approved By:**

Gary W. Meyer, Agricultural Counselor

**Prepared By:**

Sukanya Sirikeratikul

**Report Highlights:**

TH9137: The Thai Food and Drug Administration has notified WTO (G/SPS/N/THA/178/add.1) of its additional requirement in the food standard for drinking water in sealed containers.

**General Information:**

As per FAS/Bangkok's GAIN report no. [TH9123](#) regarding "Thai FDA Revising Standard for Fluoride in Drinking Water", the Thai FDA has notified WTO on August 3 (G/SPS/N/THA/178/Add.1) of an additional requirement on the chemical property of drinking water to the Ministry of Public Health (MOPH) Notification Re: Drinking Water in Sealed Containers (No. 6) Clause 3(2) previously notified as G/SPS/N/THA/178 dated 4 August B.E. 2552 (2009). The item has been revised and should read as follows:

“(s) Fluoride, computed as Fluorine not exceeding 0.7 mg. per 1 liter of drinking water and not exceeding 1.5 mg. per 1 liter of drinking water used in food processing.”

All other information remains the same as per GAIN Report [TH9123](#).

End of the Report.
